

Exercise 2

2.

Algorithm: For each char in the message, use MOD operator to shift the letter by 5.

3.

Decrypted: **puzzles are fun**

Algorithm: Shift each letter in the message by 1, until the message is readable.

5.

	Abstract Class	Interface
Keyword	extends	implements
Multiple	Not allow	Allow
Private Methods	Allow	Not allow
Design Philosophy	'is-a' relationship	'like-a' relationship
